

Faceoff Edge Limited Warranty

90days · ModelFEC1 · T&R Technologies, LLC

What this warranty covers and for how long

T & R Technologies, LLC warrants the Faceoff Edge sensor against defects in materials and workmanship for **90 days from the date of original retail purchase**.

This warranty applies only to the original purchaser and is not transferable. It applies only to sensors purchased directly from T & R Technologies, LLC or from an authorized seller.

What is covered

Housing and clip

- Splitting, cracking, or layer separation in the housing that is not the result of impact
- Clip arms that crack, deform, or lose retention during normal mounting and removal on a standard lacrosse shaft
- A clip that will not seat firmly on a standard lacrosse shaft when the sensor is new

Electronics

- A sensor that still does not function after a full initial charge of at least 8 hours
- Failure to wake on motion, or failure to appear for pairing, caused by an internal fault
- A USB-C port that will not charge under normal use
- A battery that will not charge, or will not hold a charge, within the warranty period
- A motion sensor that produces no data or clearly invalid data

What is not covered

Impact and play damage

Damage from checks, slashes, ground balls, the stick being dropped, thrown, or stepped on, or any other contact during play or handling. Cracks or clip failure resulting from contact are not covered, even where the same part would be covered if it failed during normal mounting.

Water

Ingress, corrosion, or failure caused by submersion, standing water, or use with the silicone port plug not seated. The sensor has no IP rating.

Wear, cosmetics, and consumables

- Scuffs, scratches, discoloration, and visible print layer lines
- Loss of the silicone port plug
- The included USB-C cable, which is a standard consumable accessory and is not covered by this warranty
- Normal, gradual reduction in battery runtime, which is expected in all lithium-ion cells and is not a defect

Use outside the product's stated conditions

- Disassembly, modification, drilling, adhesives, or repainting
- Damage caused by a faulty or damaged charger or cable, or by a power source that does not meet USB specifications. Any standard phone charger, computer USB port, or USB power bank is fine
- Charging outside 0 °C to 45 °C (32 °F to 113 °F)

- Use outside the operating temperature range of –10 °C to 45 °C (14 °F to 113 °F)
- Mounting to anything other than a lacrosse shaft
- A sensor reported as unresponsive that has not first been charged for a full 8 hours. The sensor has no status light and no power button, so a depleted battery and a fault can look the same — please charge fully before contacting us

Software and data

This warranty covers the sensor hardware. Problems that originate in the app rather than the sensor are handled as support issues, not warranty claims — that includes app bugs and crashes, iOS compatibility, pairing problems originating with your phone, loss of session data, and questions about the accuracy of reported metrics.

Please report these to support@faceoffedge.com anyway. We fix them in app updates, which reach you faster than a replacement sensor would and do not depend on the 90-day period.

Other

Lost or stolen sensors, sensors without proof of purchase, and sensors purchased secondhand or from unauthorized sellers.

What we will do

If a defect covered by this warranty is confirmed during the 90-day period, T & R Technologies, LLC will, **at our option**, repair the sensor or replace it with a new or equivalent unit. A repaired or replaced sensor is covered for the remainder of the original 90-day period, not a new one.

Repair or replacement is your exclusive remedy under this warranty.

Shipping costs

If the failure is covered by this warranty, we pay shipping in both directions. We will send you a prepaid return label.

If the failure is not covered — most often impact or water damage — we may still offer you a replacement unit as a courtesy. This is not a warranty obligation and is offered at our sole discretion, case by case. Where we do, you pay shipping in both directions, and the courtesy replacement carries the remainder of the original 90-day period only. Offering a courtesy replacement once does not commit us to doing so again.

How to make a claim

Email support@faceoffedge.com within the 90-day period with:

- Your order number
- Clear photographs of the sensor showing the problem, including the clip and housing from several angles
- A short description of what happened and when you first noticed it
- For a sensor that will not respond, confirmation that you have charged it for a full 8 hours first

We will respond within [number] business days. Do not ship a sensor back before we ask you to — unrequested returns cannot be tracked to a claim. If we ask for the sensor, we will confirm the outcome within [number] business days of receiving it.

Your legal rights

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

To the extent permitted by law, any implied warranties, including implied warranties of merchantability and fitness for a particular purpose, are limited in duration to 90 days from the date of original retail purchase. Some states do not allow limitations on how long an implied warranty lasts, so this limitation may not apply to you.

To the extent permitted by law, T & R Technologies, LLC is not liable for incidental or consequential damages arising from the use of, or inability to use, this product. Some states do not allow the exclusion or limitation of incidental or consequential damages, so this limitation may not apply to you.

Safety note

Stop using the sensor immediately and contact us if it swells, becomes hot to the touch, or emits an odor. Do not attempt to open the sensor or remove the battery. Doing so voids this warranty and creates a fire risk.
